

## OKS 469 - Product Information

### Fields of Application:

For the lubrication of plastic/plastic and plastic/metal combinations, e.g. single-serving taps in the food industry or for beverage can holders in the automotive industry. Silicone-free alternative for the lubrication of O-rings and sealings during assembly.

### OKS 469 Plastic and Elastomer Lubricant

### Advantages and Benefits:

Excellent adhesion on plastics with neutral behaviour to plastics and elastomers. Constant properties without drying, hardening or bleeding. Registered by the NSF in the category H1 under the number 131380, when the contact with the food is technical not excluded. No interference with the quality, taste and odour of beverages proved and verified by the "Staatliche Brautechnische Prüf- und Versuchsanstalt" of the Technical University Munich.

### Application:

For optimum effect clean thoroughly the lubrication point, e.g. with OKS 2610/2611 Universal Cleaner, where possible. Apply an thin layer of grease with brush, spatula etc. on the functional area. Avoid excess. Instructions of the bearing and machine manufacturer have to be observed. Due to a multitude of used polymers we strongly recommend to make tests in critical applications prior to use. Relubrication intervals and amount to be defined acc. to the service conditions. Mix with appropriate lubricants only. For additional questions please contact our Technical Department.

### Additional Information:

Packaging (article number):

- 1 kg Tin (00469034)
- 5 kg Hobbock (00469050)

Version  
E-04.1/13

The data in this brochure are the result of extensive testing and experience and meet the latest stage of engineering. Due to the diversity of application possibilities and technical realities they can only be recommendations and are not arbitrarily transferable; thus no obligations, liability or warranty claims can be derived herefrom. We accept liability for the fitness of our products for particular purposes and accept such liability in writing in the individual case. In any event any justified warranty claims shall be limited to the delivery of replacement goods which are free from defect or, in the event that such subsequent improvement fails, to reimbursement of the purchase price. Any and all further claims, in particular but without limitation any liability for consequent damage, shall be excluded. Prior to use own testing must be done to prove suitability. ## Technical Data

	Norm	Conditions	Unit	Value
<b>Base Oil</b>				
Type				Polyalphaolefine
Viscosity		40°C	mm <sup>2</sup> /s	400
<b>Thickener</b>				
Type				anorganic
Consistency	DIN 51 818	DIN ISO 2137	NLGI- class	2
Unworked penetration	DIN ISO 2137		0,1 mm	265 - 295
Oil separation	DIN 51 817	168h/40°C	weight-%	1.36
<b>Application Data</b>				
Density	DIN EN ISO 3838	+20°C	g/cm <sup>3</sup>	0.84
Colour				colourless-transparent
<b>Service Temperatures</b>				
Minimum service temperature			°C	-40
Maximum service temperature			°C	150
<b>Releases/Specifications</b>				
Food industry				NSF H1 Reg.-no. 131380 approved by the BPV Weihenstephan
